[How To Convert Seagate Freeagent Go For Mac](#)

I personally didn't find the dock necessary, but some users will be thankful it helps reduce the amount of clutter on your desk.. However, it is not appearing on my desktop or in disk utility despite the lights being on.. The dock plugs into the computer via a FireWire 800 cable and functions much like an iPod or digital camera dock would.

11) I was leaning toward getting a WD My Passport Essential because it's compatible with macs and pcs.. 0 connection These times, along with the low memory Photoshop test results (FireWire 800, 1 minute, 38 seconds; FireWire 400, 1 minute and 45 seconds; and USB 2.. Once you get through the unwieldy packaging, it's easy to pop the drive into its little dock station for use.

I have it partitioned into 3 partitions, 2 for backups (L 10 5 and SL 10 6) and one for data.. I wanted to replace it with something a little bit larger and something that doesn't require external power.. I remember I had to follow a procedure to change it from FAT32 to OSX Extended, when I just press erase I get an error.. 0, 1 minute, 48 seconds) are not only faster than most portable drives we've seen, but comparable to many larger desktop drives.. Can the hard drive be used with only one USB while in the dock? Or can it only be used with one USB when mounted by itself? Jan 23, 2010 I have heard of a lot of issues with Seagate desktop drives so I would never buy one, but I had never heard of problems with their laptop drives so I took a chance a while back and got a FreeAgent Go 640GB external at Fry's.

Purchased 26 May 2008, S/N 5QD375A2 P/N 9NK2A6-51 (though difficult to read as very small)(OSX 10.. 5 8, 2 16 Ghz Intel Dec 24, 2008 I've just bought a new Seagate Freeagent drive to replace my old one.. The Seagate FreeAgent® GoFlex™ TV HD Media Player makes it easy and possible for you to watch, share and play all of your digital media files like movies, music and photos on your widescreen TV, in full 1080p HD with stunning surround sound.

0, and FireWire 400 on a MacPro In our Copy 1GB test, the drive took 41 seconds on average with the FireWire 800 connection, 51 seconds for the FireWire 400 and 45 seconds with the USB 2.. The FreeAgent Go comes formatted for the Mac, is Time Machine-ready right out of the box, and is available at 250GB ($160) and 320GB ($190) capacities.. I have the 320 GB and it works just fine I thought disk utility worked with any HDD? Similar Messages: • ADVERTISEMENT Jan 2, 2010 I have a Seagate Freeagent Go 750GB that my Mac won't recognise.. I've run Disk Utility many times and it won't fix the problem I've followed all the steps in the knowledgebase articles.. The Seagate FreeAgent Go has gotten better reviews so now I am thinking of However you have to reformat it in order for it to work on a mac.
