it only has one row where is my bulk insert statement The problem is most of the time it works great but in some situations (this being one of them) I get the errors ANY ideas on what is causing this record to have this error It's picking up the commas within the comments field as delimiters, because the delimiters are not consistent.. Your statement then would look like: In my case, I was dealing with a file that was generated by hadoop on a linux box.

The problem I am facing is that I get errors when running bulk insert The tables all have one extra column which is a primary key identity value.
